The Conservation Pledge

I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.

GMOs in USDA Organic Food

Please search the internet for, “*GMOs in USDA Organic Food*” and watch it. The video published on YOU tube April 12, 2013. Apparently there are loopholes that now allow *Genetically Modified Organisms* (GMOs) plants or seeds that are produced by *Genetic Engineering* to be grown organically and to get the **USDA Certified Organic** seal.

Meanwhile the **GMO-Free Project Verified Seal** means the food is non-GMO but not necessarily organically grown. Non-GMO food could have been grown conventionally with the same chemical fertilizers, herbicides, and pesticides as GMO crops, or not.

For quality assurance, look for products carrying *both* seals.

Who BOUGHT the USA

CONGRESS aligned with MONSANTO and their allies by subsidizing Frankenfood crops and by allowing corporate personhoods to use Big Money as free speech. The draconian strategy is that out-of-state funders buy up air time and run ads opposing, “*Produced by Genetic Engineering*” labeling because JUNK FOOD is the name of AMERICA’s profitability game.

The OLIGARCHY won’t let the right to know campaigns win because they won’t risk losing their selfish profits, even though national health is down the toilet. Is the United States of America (USA) toast because of failed politics. How sad would that be to the citizenry. The elected officials are failing AMERICA’s grandchildren by passing bills with special interest riders for Big Business profitability rather than envisioning the drawbacks for the seventh generation. There are ethical and spiritual implications in regards to the exploitation of all natural resources. Think about the environmental legacy being visited upon Generations X, Y, and Z because of the love of money. If politicians hadn’t sold out to special interests, there might never have been the global meltdown we are living through. Man-made sea change sources back to dirty politics. You might want to watch the documentary film, BOUGHT and call a spade a spade.

.....

Global Obesity

The global cost of obesity has risen to \$2 trillion annually—nearly as much as the combined impact of armed violence, war and terrorism, according to a new report released by THE MCKINSEY GLOBAL INSTITUTE.

About 2.1 billion people are overweight or obese. That is about one third of the global population. If you follow the money trail about 15 percent of health care costs in developed economies are driven by it. The report predicted that by 2050 half the adult population on EARTH shall be overweight or obese.

The Ideology Behind Totalitarianism

If you haven't yet viewed the new documentary, FED UP, it is a must-see for all Americans. By all means rent the new movie from your local video store, or go online and purchase it at <http://www.fedupmovie.com>.

The new documentary film, FED UP, exposes how the *Food Industry* bamboozles. They stack the deck against the citizenry by using a very predictable lobbying script about free enterprise and free speech. Such fallacious reasoning has resulted in food totalitarianism, forcing conformity to sugary and corn syrupy junk food ideology, The film makers are *Laurie David*, producer of AN INCONVENIENT TRUTH, and *Katie Courie*.

Agricultural subsidies from the government of the USA are at fault for aiding the GMO junk Food Industry's crops. CONGRESS bargains with the devil by allowing special interests to insert their provisions into bills such as Special Budget Bills or the Farm Bill.

Last year OREGON's *Governor Kitzhaber* succumbed to compromising the citizenry's human rights by signing the special budget package that had a GMO special interest provision rider. Thankfully *Senator Bates* and *Representative Buckley* exempted Jackson County and 66 percent of the citizenry voted to ban GMO crops from Jackson County. But the other counties in OREGON were blackmailed. The latest euphemism for turning traitor to democracy and human rights is called, "*Compromise*".

The European Food Supplements Directive

In 1996 the *UN Codex Alimentarius Commission* launched a worldwide initiative to restrict access to natural medicines. By 2005 the EUROPEAN UNION (EU) used *Codex* to pass *The European Food Supplements Directive*, to remove vitamins from shops in the *United Kingdom* (UK). Herbal formulas and natural medicines were made unavailable, except by prescription only. **The classification of "drugs" was expanded to include food and water.**

(Source: GUINNESS WORLD RECORDS 2013 *Discover a World of New Records*)

Irradiated Food

In 1957 a facility in *Stuttgard*, WEST GERMANY, started nuking spices with an electron beam.

In 2003 *Codex Alimentarius* removed any upper limit on recommended radiation doses for food. Dear Readers did you even notice when the irradiation symbol that used to be required on human food in the grocery stores, was removed from packaged food. No, like sheep to the slaughter, you probably didn't.

By 2013 some hospital food was subjected to the highest radiation dose in general use, 70 Kilograys (kGY). **Since a lethal dose to humans is about 0.0056 to 0.0075 kilograys (kGy) it is easy to die in the hospital.**

(Source: GUINNESS WORLD RECORDS 2013, "*Green Earth*", *Nuclear Energy*, pages 43-44)

Isn't it Curious

Henry Kissinger's global *Population Control* by 2050 seems to be stealthily right on schedule. How chilling that the elite's depopulation goal includes the American People as well as emerging trade markets. As our trading partners get richer, the rate of obesity in developing countries is rising to the same level as ours.

Did you ever stop to think it is beneficial to the *Insulin Drug Industry* for the global population to suffer from sugar diabetes disease epidemic. Stop now and realize that the patented GMO crops bolster the *Health Care Industry's* conveyer belt with lots of diabetic patients. The *Obama Administration* winks at the foreign invasion of our soil by SYNGENTA SUGAR BEETS.

BAYER, BASF, DOW, DUPONT, MONSANTO, and SYNGENTA are part of Big Pharma's pharmaceutical *Food Industry* that fights the citizenry's right to know GMO labeling initiatives with millions, now that legislators allow MONSANTO and their allies to use Big Money to buy up the air waves with their advertising propaganda that sways voters into self-sabotage. This is not "free" speech but BOUGHT.

When I was helping to gather signatures last year for Measure 15-119 to qualify for a vote of the people to ban SYNGENTA GMO sugar crops from *Jackson County*, OREGON, a man eating lunch on the Ashland Plaza yelled, "*I'm opposed to what you're doing*" so I responded, "*Good, let me come over and talk with you*". He proceeded to tell me that SYNGENTA does not want a cure for diabetes or obesity because SWITZERLAND makes the best Insulin on the market.

I replied that the nation of GERMANY had brought lawsuit against SYNGENTA because SYNGENTA GMO corn had killed cattle, and that GERMANY and SWITZERLAND ban them from their own homeland soil, so it is an invasion of U.S.A soil to allow them here.

Next he said, “*People will do anything for money*” to which I replied, “*Some people won’t.*” Then he asserted that the American People think the Jews were killed by the Germans in the gas chambers, but that really they died from being first sprayed with pesticide before being put into the ovens. I asked if the chemical trails being sprayed in the skies over USA soil included pesticide spraying, and he wouldn’t answer my question.

He, instead, boasted about having planted GMO crops all over NORTHERN CALIFORNIA, and asserted that no county ban could keep his GMOs from blowing their cross pollination across our county’s lines.

His *Ace in the Hole* remark was that he *could* not sign the petition to ban SYNGENTA sugar beet test plots in *Jackson County*, because it would make him look like a hypocrite all around the world where he would be recognized by name. His love had waxed cold because of his idolatry in worshipping himself. His image was his god. Of course the smooth draconian speak TV ads aren’t going to tell why SYNGENTA and others actually oppose the grassroots initiatives for human rights.

The Insulin Profiteers have heavy reliance upon GMO food being fed to the American People without your informed consent, because the worldwide obesity epidemic is the driver behind more and more sugar diabetic patients from whom their profits derive.

If there were a common sense natural cure for diabetes, it might cost too much in terms of lost profits for Big Pharma’s trillions. But it is okay with their seared consciences if the average person is burdened with the cost of diabetes. Their choice to continue to harm may be deliberate denial of the facts.

Doing deliberate harm would mean they should be demonized as the FED UP movie asserts, because they won’t ever care about how much you suffer from their worldwide disease epidemics even if their face is rubbed in it. They have too much money and reputation at stake than to repent.

The cancer epidemic is also an evil driver behind more patients being supplied to the Chemotherapy conveyor belt system. The biocide producers are profiteers and the money trail leads to your final cremation so nothing has really changed much since the American government brought the German chemists and nuclear physicists over here. Can you see the end result is death. *Human change is a life and death issue that should mean more than a paycheck or job security.*

The Sky Is Falling

The sky is now literally falling because aluminum and other toxins are being sprayed into the air and the chemtrails settle down into the soil and water. Look who profits next up. It’s apparently very profitable for MONSANTO to patent aluminum-resistant seed crops. The problem is that ruining the soil means other crops won’t survive, which is handy dandy for global plantation land grabs, until the dirt becomes a dust bowl. Did you see the movie IDIOCRACY.

The Mythical State of Jefferson

OREGON voters may seriously kick butt with YES on MEASURE 92 to label GMO food because of the state of our national ill health. What's needed is strong articulation about how mentally, morally, and physically sick the American People are, in order to counter the air time ads that MONSANTO and their allies buy in order to inject disempowering doubts into the minds of voters. Soft ball tactics won't win a hard ball game with MONSANTO.

What Don't We Know

I was recently at a town hall meeting that was being filmed and was surprised that the man behind the camera asked Jackson County's outgoing *Commissioner Skundrik*, what his definition of the word, "*Fascist*" is. He answered something but it got me to thinking how many beliefs could just dissolve back into the nothingness from which they came. Remember *Atlantis* is all gone.

It is a wonderful meditation to dwell on how to honor the changing tides of time. It was the navy who first discovered the rising sea waters. The *Marshall Islands* are only six-feet above sea level so climate diplomacy has become the curious biggest Threat to *Homeland Security*.

With the Army Recruiters at the doorsteps of AMERICA's public schools, and military armaments being handed out all over the country, could it be time to question afresh. Who profits from propagandizing the kids to believe the war jig is a dance step that can't be changed now. And since when is the Military-Industrial complex the Holy Grail of the modern world, which is what movie goers see on the Big Screen.

Forgive me for being ironic but after watching several of the blockbuster movies this year, Big Box entertainment seems to make life seem cheap. Perhaps the Pentagon wants movie makers to glorify weaponry because the USA economy is based on war.

Is it really true that the global economy could not go directly from war to peace. But it seems ridiculous that *World Peace* would threaten the richest nation on EARTH. You see, the time has come to question such presuppositions because anything that humans believe can be *unbelieved* in an "*Aha*" moment, giving yourself permission to let go of learning war.

What if the BEST CASE SCENARIO in the *Field of All Possibility* has been the *Unknown Field* that is open and available to each and everyone at all times on all planes. We may not know which generation will be the first to learn war no more, because that thought field is entered individually until enough individuals have reached critical mass. Your unconscious mind knows how to do that instantly, right now.

Please Do Your Part

Consider *Donald Rumsfeld's* words, "*There are known knowns, things we know we know. There are known unknowns, things we know we do not know. But there are also unknown unknowns, the ones we don't know we don't know.*" We don't know that we don't know who is whom from past lives for example. Did you see the movie GROUNDHOG DAY. Maybe this time around we can change the script. But we had better hurry because we are already well into the sixth extinction of species.

Dear Readers, I have chronicled where NOW is, because the purpose of life is to *Create the Future*. The very Temple of Life, our food supply, is under DNA and biocide attack. It is an abomination to Great Mother EARTH to make her Seed Temple desolate. Disease epidemics are already knocking on AMERICA's door. If our great nation fails to save the pollinators then starvation may come knocking as well. Famine is an ugly specter. *Rodale Institute* would have done a better job at the helm of the *United States Department of Agriculture* (USDA) than the Gone Mad. You are what you breathe, eat, think, say, and do, so let's all push the "*Refresh*" key to rethink America's future.

It's time for brand new art, new decorations, new entertainers, new authors, new film producers, new musicians, and new toy makers who depict the kids having a *Future and a Hope* that there will still be a planet for Generations X, Y, and Z.

Be Your Own Santa Claus

The *Eco-Community Dialogues* newsletters are a FREE community service, available by request, at the *A Street Print & Parcel* across from ACE hardware, in Ashland, OREGON. The print shop only charges for paper and ink, or will download the entire PDF file of current and back issues onto people's flash drives to read off their computers and save paper and ink. It's up to you to provide your own flash drive.
